

Automotive Testers

RT-05 Automotive Relay Tester

Quickly and accurately test 3 terminal electro-mechanical relays for many domestic and imported automobiles. The Automotive relay tester will interrogate and identify an unknown relay terminal configuration then self configure its own internal circuitry to perform all required test functions automatically. The Automotive relay tester can be used to perform the following tests: coil resistance, surge suppression device (resistor or diode), open/closed contact integrity, contact cyclic testing for intermittent failure detection, loaded contact continuity, relay contacts stuck open or closed and time to contact closure and opening. Unit automatically indicates test results with a series on red, green and yellow performance lights.

CE  
EMC  
EN: 61326

Model RT-05

Specifications

Coil Resistance	20 to 500 ohms (includes any parallel transient suppression resistors)
Coil Test Voltage	9 Volts
Contact Resistance Threshold	200 Milliohms

Size(HxWxD): 128mm x 68mm x 30mm  
Weight: 185g

Accessories:  
One 9V battery, clamshell

BT-12 Digital Automotive Battery Analyzer

BT-12

AT-05A Automotive Tachometer

Professional digital tachometer measures accurate engine RPM with Inductive Pick-up

AT-05A

- Range: Ethylene glycol 1.15-1.30 specific gravity
- Minimum Scale Division: 5°C
- Automatic Temperature
- Compensation range: 10 to 30°C
