Point-precise measuring with laser light to determine lengths exactly

1. Simple height measurement with dual **Pythagoras measurement function** to automatically detect heights

2. + 3. The area and volume functions permit the acquisition of room sizes, for example to calculate material quantities

– Simple assessment of room perimeter with the **addition and subtraction functions**.

– The **wall surface function** automatically adds up surfaces by measuring the lengths of walls as well as their height once.

– With versatile calculation and memory functions

– **Measuring accuracy** up to 30 m: ± 3 mm*

– **Inside measurement range: 0,2 m to 30 m.**

– **3 selectable measurement reference points:** front, rear and pin

– **Min/Max function** to determine diagonals, verticals and horizontals

– **Reference mode** for easy transfer of lengths

– Illuminated 3-line LCD

– With fold-out pin for measuring from inside corners
