

OHSP Spectral Color Luminance Meter

OHSP series portable spectrum color illuminance meter is the research and production of Hangzhou OhomeSmart Technology Co Ltd, set of spectra, color, illumination, radiation, stroboscopic measuring functions. The 5 inch big screen, the measurement parameters and curve of real-time display, convenient use, can be tested directly in the lighting scene, can measure a wide spectrum light source, LED light source can also measure energy-saving lamp CFL, high low pressure sodium lamp HID narrow spectrum, can be used for the design, construction stage lights, plant growth lamp, engineering application environmental light testing.

1、Product advantage

Long telephoto optical system, the optical resolution of 2nm, a wider wavelength range, LED can measure a wide spectrum light source, light source measurement can also CFL energy saving lamp and high low pressure sodium lamp HID the narrow spectrum;

Those with automatic zero and zero compensation technology, the largest integral time can be longer, can measure the weak light signal;

Those with electronic shutter technology, the minimum integration time can be less than 50uS, can measure more light signal;

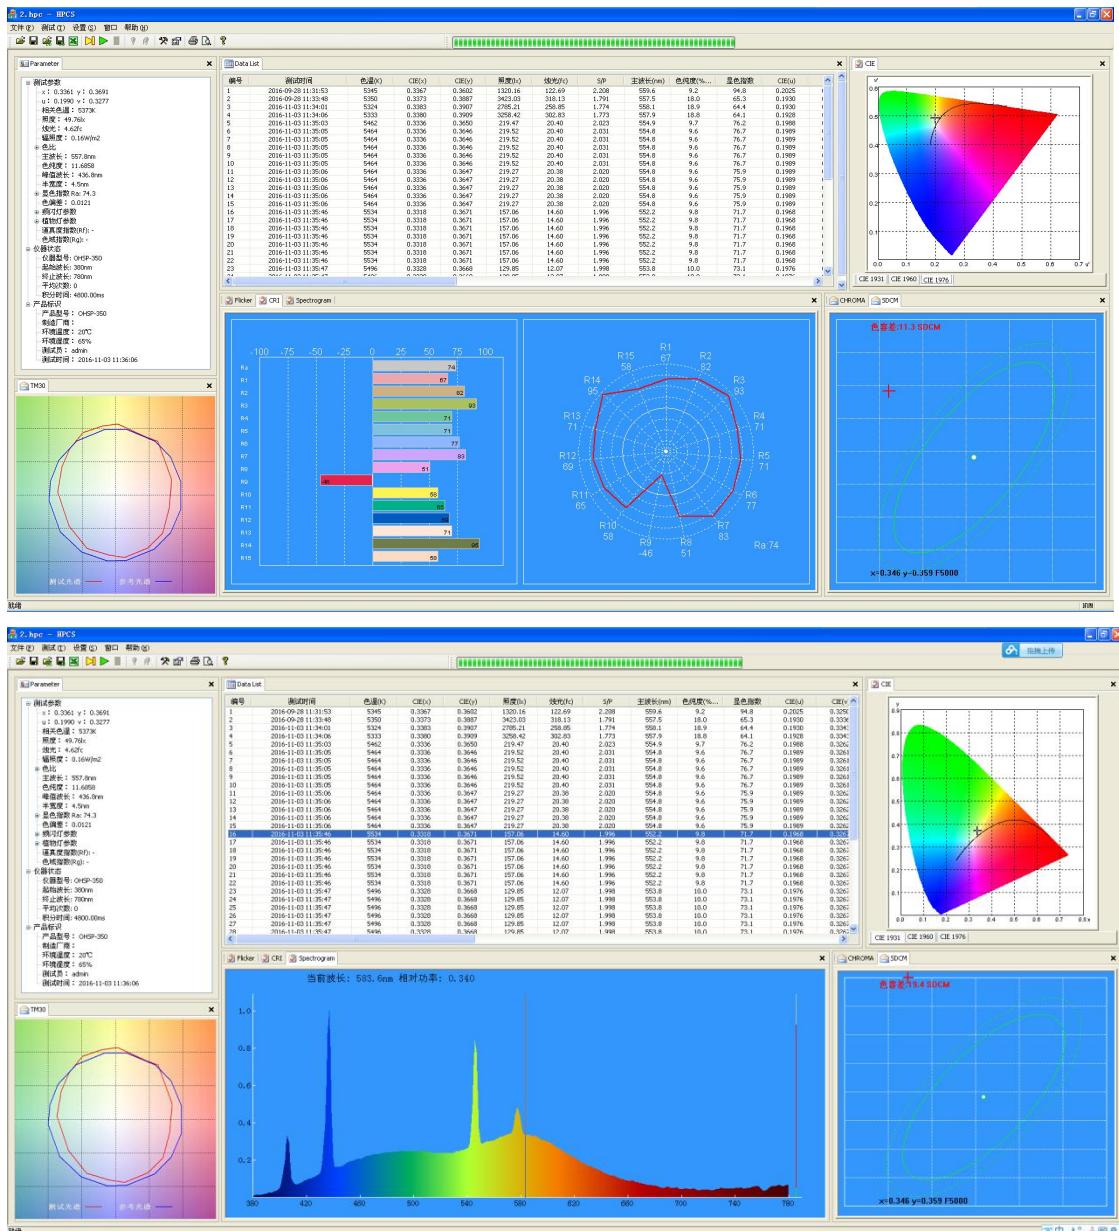

The fast switch machine, a key test, use more convenient,;

The large size HD IPS capacitive touch screen, high resolution display, the screen display more content, bright color, can be used outdoors;

The large capacity battery, 24 hours long test time;

一、OHSP350C/OHSP350/OHSP350S SPECTRAL IRRADIANCE COLORIMETER

(Note:350C No software、350basic model)

Application: the illumination and spectrum measurement of light source like LED,OLED,CFL energy saving lamp and HID high low pressure sodium lamp etc.

Characteristics:

Long focal length optical system, 2 nm optical resolution

High performance linear CCD sensor 3648 points;

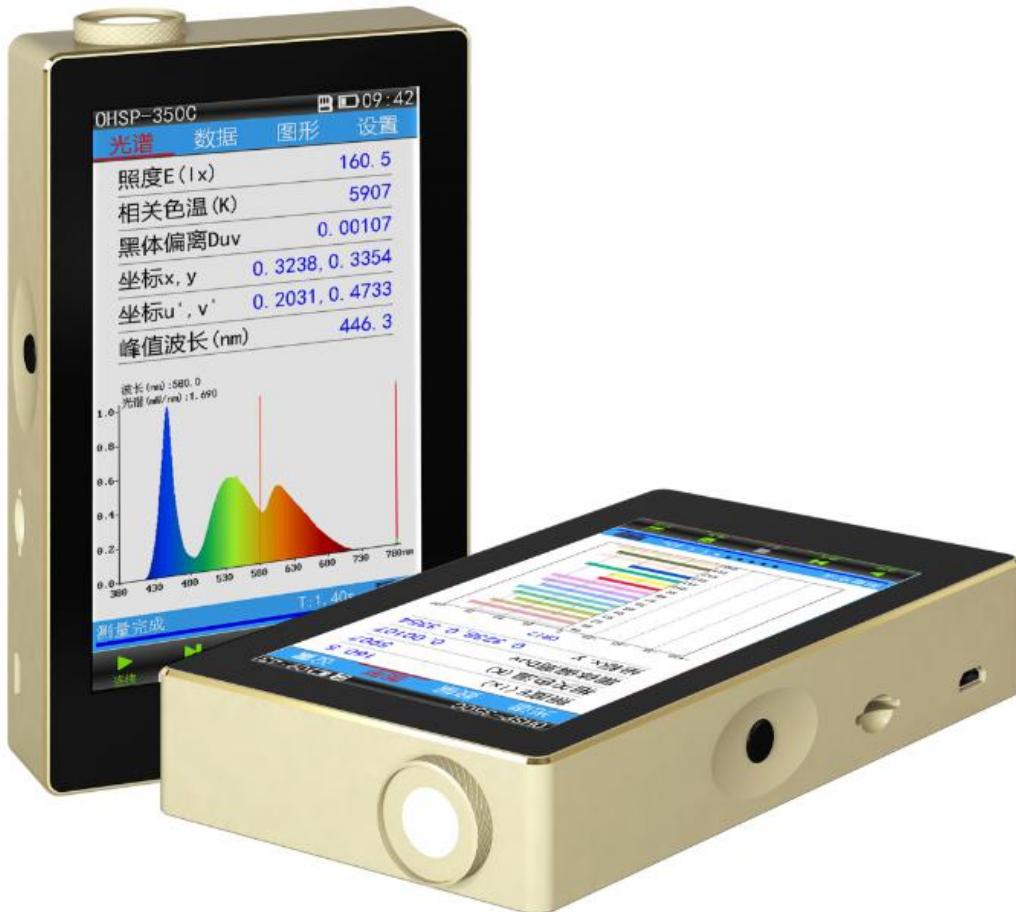

Automatic zero and zero compensation technology, boot no manual zero;

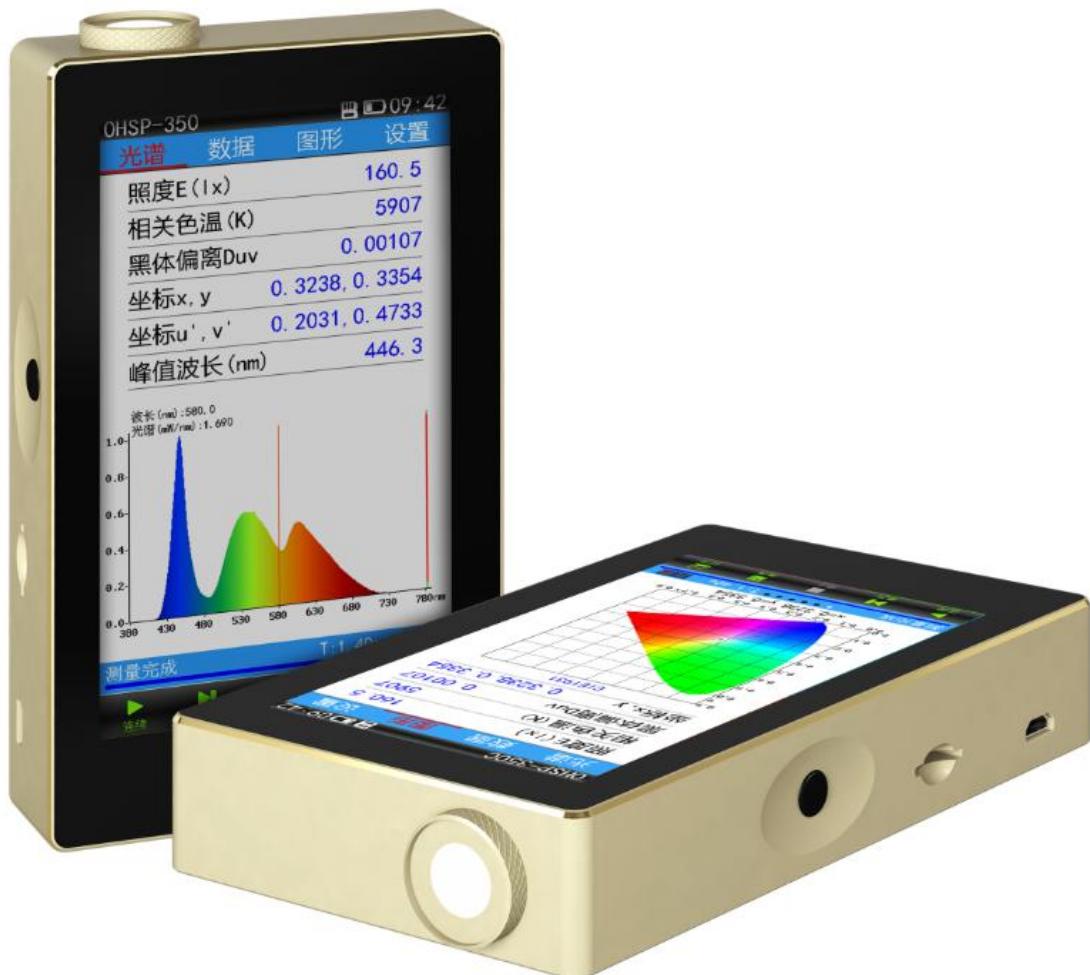

Electronic shutter technology, the minimum integration time 50 us, measurable stronger light signal;

Quick switch machine, a key test, the use of more convenient
5 inch high-definition IPS screen, capacitive touch screen, display more content;
Bring 4000mAh large-capacity lithium battery, 24 hour long test time;

CHARACTERISTICS AND SPECIFICATIONS
